From January till March 2013 the piloting of the Benchmarking tool was done in Italy.

15 individual meetings with VET centres and Vocational schools of Tuscany were fixed and fulfilled. The meetings had place partly in locations of the VET providers and partly in ASEV's premises.

One VET institution was interviewed telephonically and then by mail.

So totally ASEV has managed to reach 16 VET centres and vocational schools from the following cities: Empoli, Florence, Pontedera, Pistoia, Livorno, Bagno a Ripoli, Prato, Colle di Val'Elsa and Genova, which belong to the following types of VET institutions: lower secondary vocational education and training – 4; post secondary non-tertiary vocational education and training – 2; higher vocational education – 4; further education and training – 6.
